

## INTENDED USE

Bracket for CH100-2T channel to allow rotation of channel. The bracket must be used at both ends on the horizontal channel, not suitable for single side use.

## INSTRUCTION FOR USE

Attach the starter bracket loosely using M10 bolts. Adjust to desired position and tighten securely. The channel must be inserted at least 100mm into the bracket.

**Note:** Fixing bolts are in line with one another. Care should be taken when combination forces are present.
