

## INTENDED USE

Bolted channel cantilever brackets for supporting from Mekano® CH100-3 channel.

Suitable for light to medium loads, and in lengths 200, 350 and 500 mm.

The bracket is adjustable in 5 mm increments using the Oglaend Nonie™ system.

## INSTRUCTION FOR USE

Measure and mark the position of the brackets. Where possible, loaded sections should be joined together so that the open end of the "C" is closed by the section being attached. This increases the torsional strength.

Slide the Mekano® CH100-3 channel, and tighten with self locking bolts.
