

## INTENDED USE

Covers for straight lengths of FOE cable ladder and fittings offer protection from falling objects, UV radiation from sunlight and give the cables basic protection from weather and vandalism.

## INSTRUCTION FOR USE

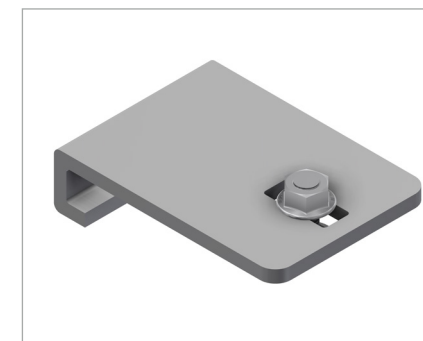

1. Covers are supplied in 3 metre lengths, consisting of 4 interlocking sections.
2. Additional sections may be introduced to increase the length. Each section increases the length of the cover by 750 mm.
3. Clamps are required to keep the cover in place. There are several options available, each providing varying degrees of wind resistance.

The Heavy Duty Cover Fixing Clamp provides protection from winds up to 90 km/h with 4 clamps per 3 metre section or 160 km/h with 8 clamps. For more information please refer to the HD Cover Fixing Clamps user guide.

The Flexi Fixing Clamp provides protection from winds up to 80 km/h with 2 clamps per 3 metre section or 110 km/h with 3 clamps. For more information please refer to the Flexi Fixing Clamp user guide.

The GP Cover Clamp provides protection from winds up to 70 km/h with 6 clamps per 3 metre section or 110 km/h with 8 clamps. For more information please refer to the GP Cover Clamp user guide.
