USER GUIDE · BOLTED STARTER BRACKETS FOR CH100-2T

Mekano® - Bolted Starter Brackets

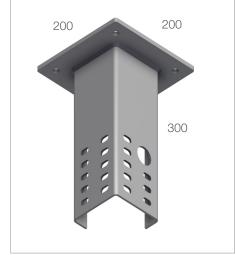

INTENDED USE

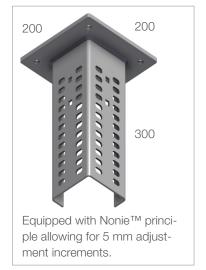

Bolted starter brackets for fixing CH100-2T channels. Suitable for direct fixing using M12 bolts 150 mm CC or bolting via a doubling plate. Can be used on ceiling, wall or floor. Lengths 200 mm & 300 mm.

INSTRUCTION FOR USE

Attach to structure using suitably graded bolts. We recommend using Øglænd System metric anti vibration flange nuts. Depending on the type, tighten to the specified torque.

Bolted starters can either be directly fitted to the structure, or fitted to a doubling plate using the M10 bolts supplied.
